

# Fast Touch for Healthcare

**Mobile Data Terminal Solution for Emergency Public Health & Safety.**

## Fast Touch - Mobile Data Terminal solution

The fast Touch is an innovative solution for Health Care organizations. The Fast Touch system helps healthcare organizations to improve public health cost more efficiently and effectively. The Fast Touch provides field healthcare workers with instant access to health information and real time reporting of patient's conditions and treatment anywhere, at anytime. It helps save lives and lowers public healthcare costs.

The Fast Touch empowers a new level of community health care services to residential and remote locations, thus maximizing hospital usage and delivering a larger public health care.

## Fast Touch Benefits

- Quick Communication between Hospitals, Ambulance & Mobile Health Care Workers.
- Improve the Health information access to, and from the field for better patient care.
- Appropriate treatment in emergency vehicles and in the field can be applied for saving lives.
- Improve productivity of Public Health Care
- Reduce Operation and Reporting costs.
- Online consultative communication between field health workers, hospital Doctors and specialists for improving patient conditions.

**Fast Touch.**
